\$2m MRR Grant for Computer Replacement:

62 systems turned in purchasing plans for a total of 3,968 machines:

- 55 systems deploying 1,714 PCs and Laptops
- 37 systems installing 981 new monitors
- 30 systems deploying 690 Google Chrome boxes and Chrome books.
- 30 systems installing 124 printers
- 22 systems installing AWE early literacy stations
- 15 systems deploying 277 tablets & E-Readers
- 3 systems deploying 3D printers.
- 1 system deploying 25 virtual machines.

New Approach to Public Access Computing:

- If the libraries had just replaced one desktop with another, they would only have been able to replace approximately 2,000 machines.
- By doing their research and investing in staff training, public library systems were able to take advantage of evolving technology and leverage the MRR grant in order to not only replace out of date machines, but to increase the computing footprint in Georgia.
